# MORUF BABATUNDE ADEBOLA

## SOFTWARE ENGINEER / FULL-STACK DEVELOPER

✉ morufbadebola@gmail.com  📞 +27 64 205 7309  🔗 linkedin.com/in/moruf-adebola  🔗 Portfolio  📍 **South Africa.**

## SUMMARY

Creative and detail-driven **Frontend Developer** with a strong foundation in **React, UI/UX** principles, and collaborative **product development**. Skilled at translating complex ideas into clean, **responsive, and engaging user interfaces.** Adept at integrating **APIs, authentication systems, and version control** to deliver secure, scalable solutions. Passionate about bridging **design and engineering** to build products that delight users and drive results.

## EXPERIENCE

### Full-Stack Developer
**Collaborative Projects**

📅 Jan 2025 - Present   📍 Remote

Remote full-stack development projects

- Collaborated with **5+ cross-functional teams** to build responsive interfaces, improving user satisfaction and usability.
- Translated **20+ UI/UX designs** into functional React components, **reducing frontend bugs by 30%.**
- Integrated frontend logic with **backend APIs** to deliver seamless **user experiences**
- Oversaw **50+ commits and 20+** pull requests using **Git/GitHub,** streamlining **team collaboration** and reducing merge conflicts by **35%.**
- Provided project updates using **Slack and Notion.**

### Frontend Development
**Freelance Consultant**

📅 Nov 2024 - May 2025   📍 Remote

Freelance frontend development consulting

- Guided **startups and small teams on UI/UX strategy, design audits, and web tech stacks.**
- Assisted **3+ clients shape MVPs and streamline user flows,** accelerating development cycles by **25%.**
- Directed **design-to-development** handoff for **5+ projects,** ensuring 100% mobile **responsiveness** and reducing design related rework by **36%.**
- Delivered **3+ products** from concept to launch, meeting deadlines and **achieving 75% client satisfaction ratings.**

### Software Engineer
**Collaborate Project**

📅 Sep 2024 - Feb 2025   📍 Remote

Miva Open University project collaboration

- Created **15+ reusable React components,** cutting code duplication and speeding feature delivery by **70%.**
- Engineered backend features in **Python to process student data,** improving data accuracy and **reducing processing time by 40%.**
- Engaged to **standups, conducted** code reviews, and **debugged issues, resolving 5+ bugs per sprint** and increasing sprint completion by **38%.**

## EDUCATION

### B.Sc. Software Engineering
**Miva Open University**

📅 May 2024   📍 Lagos, Nigeria

- Completed five full product development cycles with **Agile teams, covering design, implementation, and testing.**

## SKILLS

Bootstrap  Figma  Git/GitHub  APIs

HTML  Interactive Design  JavaScript  Express.js

JIRA  MongoDB  Microsoft Teams  Mockups

Next.js  Postman  Python  React  REST

Slack  Storyboarding  Tailwind  UX Research

Vercel  Visual Studio Code

Wireframing  Creative Problem Solving

TypeScript  ChatGPT  Cloudinary

## INTERESTS

⚑ **Design Research**

Passionate about exploring user needs to shape better design decisions through **research and testing.**

## KEY ACHIEVEMENTS

⬢ **Tourvisto Travel**

Set up the admin **backend** with **complete signup/login functionality and fully integrated Google OAuth using the Google Cloud Console.**

⬢ **JOMT Journal**

Designed and developed an **interactive journaling dashboard** that allows users to log daily habits, write personal reflections, and visualize their progress over time, aiming to support self-awareness, **consistency, and personal growth.**

## COURSES

### Certifications
### Diploma in Full-stack Development
**PluralCode Academy**

📅 Aug 2023   📍 Lagos, Nigeria

- Trained in building dynamic web apps using **HTML, CSS, JavaScript, React, Node.js, and MongoDB.** Acquired practical experience working with **APIs, implementing authentication flows, and managing codebases with Git.**
